Sof-Tek Superior Control Panels

Over 10 Years of streamlined production processes, relentless quality control, and continuous improvement.

Contract Manufacturing

End-to-end custom panel and PCB design, manufacturing, and commissioning, or any part of the process

- PCB Design and Assembly
- Functional Testing
- Custom Enclosures
- On–Premise Commissioning
- Sub-Assembly

Qualified Electrical And Mechanical Engineers

- Catch design issues before they become problematic
- Deliver cost efficiencies, increase operation stability, and decrease future downtime by collaborating on design and parts options
- Solve supply chain issues with smart suggestions for alternative components and guaranteed traceability

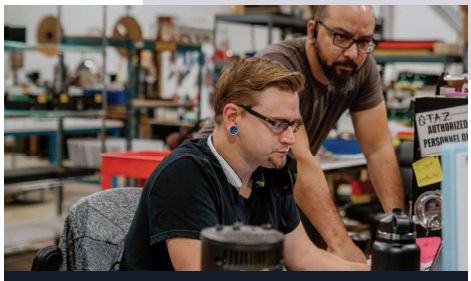

18,000 sq ft flex capacity for contract manufacturing just outside the Bay Area

Experienced engineers and time-served wiremen live in this highly desirable family-friendly locale which means uncompromising quality, lower turnover, and preferred pricing for your projects.

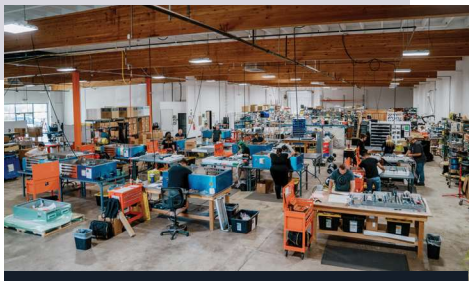

> **Talent, floor space, inventory management, and technology. Sof-Tek delivers to our strictest regulations at less cost than in-house.**
>
> *OEM, COO*
